

Trading Strategy: Option Writer / Energies

Investment Information

Program Description: The trading strategies seek to profit in both rising markets and declining markets. (The potential for loss is, of course, also equal.) Additionally, the trading strategy has the potential to perform well in both inflationary and deflationary periods (unlike stocks). The strategy is based on the belief that investments in stock indexes and commodities, not individual stocks or sectors, hold more possibilities for growth than day trading, swing trading, trend following or "buy and hold" strategies. Since markets do not operate in a static environment and are constantly changing, it is necessary to continually evaluate where we have been, where we are going and to adjust accordingly. The strategy incorporates 5 vital elements; fundamental analysis, technical analysis, strategy, money-management and risk assessment. Fundamental analysis is the study of the economic environment, both macro and micro and considers supply & demand, interest rate policy, labor productivity & monetary policies as well as the state of our economy and global economics and political situations. The use of fundamentals assists in recognizing potential trading opportunities and aids in determining what the market is thinking and how it might react. Technical analysis is the study of price movement in the context of statistical and probability outcomes. It is the study of price pattern histories in order to attempt to predict how prices might react in the future. The use of technical analysis assists in determining favorable entry or exit points of positions.

Program Start Date	Dec-2013
Percent Discretionary	100%
Percent Systematic	0%
Minimum Investment	15,000
Management Fee	2.00%
Incentive Fee	20.00%
Margin	50-60%
Round Turns per Million	15,000
Currency	US Dollar
NFA No:	#0419569

Performance Since December 2013

Growth of \$1,000 VAMI - Program vs. Benchmarks (since Dec 2013)

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS. TRADING FUTURES AND OPTIONS INVOLVES SUBSTANTIAL RISK OF LOSS AND IS NOT SUITABLE FOR ALL INVESTORS. THERE ARE NO GUARANTEES OF PROFIT. PROSPECTIVE CLIENTS SHOULD NOT BASE THEIR DECISION ON INVESTING SOLELY ON THE PAST PERFORMANCE PRESENTED HEREIN.

***** Historical Drawdowns & Recoveries:** The drawdown begins in the month listed as start. The length in months of the drawdown is listed under length. The recovery begins in the following month, and the length of the recovery period is listed under recovery. The date listed as end is the month that the program recovered from the drawdown.

Statistical Notes

1. Peak to Valley Drawdown ("Maximum Drawdown") is the worst drawdown % loss over the period of 2013-12-31 to 2015-11-30
2. The Compound Annual ROR is the average return of an investment over a number of years. It smoothes out returns by assuming constant growth.
3. Downside Deviation uses a 5% Minimum Acceptable ROR
4. Sharpe Ratio uses a 1% Risk Free ROR
5. Sortino Ratio uses a 5% Minimum Acceptable ROR
6. Calmar Ratio Uses last 36 months of Data
7. Sterling Ratio uses last 36 months of Data
8. The hypothetical growth of \$1,000 VAMI

ROR = Rate of Return

AG CTA Index: The Autumn Gold CTA Index is a Non-Investable Index comprised of the client performance of all CTA programs included in the AG database and does not represent the complete universe of CTAs. CTA programs with proprietary performance are not included. Monthly numbers are updated until 45 days after the end of the month. Investors should note that it is not possible to invest in this index.

SP 500 TR: The S&P 500 indices are designed to reflect all sectors of the U.S. equity markets. The S&P 500 includes 500 blue chip, large cap stocks, which together represent about 75% of the total U.S. equities market. Companies eligible for addition to the S&P 500 have market capitalization of at least US\$3.5 billion. The TR Index accounts for the reinvestment of dividends.
