

Trading Strategy: Option Writer / Energies

Program Description: Bluenose Capital Management, LLC's primary goal is the development and implementation of alternative investment strategies to generate better than average growth. Unlike traditional equity managers, our managed futures programs seek to be flexible enough to profit in rising markets as well as declining markets and inflationary or deflationary environments. Further, we believe that investments in stock indexes and commodities, not individual stocks or sectors, hold more possibilities for growth than day trading, swing trading, trend following or "buy and hold" strategies. Since market conditions are constantly changing, we continually reevaluate the particular strategies being employed at any point in time. The program trades the Energy market.
